

OUR CONSTRUCTION AND INFRASTRUCTURE PRACTICE

Our construction team is a dedicated group of lawyers who focus on serving the construction industry globally, and comprises experienced international arbitration lawyers who represent clients in complex, multi-claim disputes.

We advise clients on a broad range of construction disputes including dispute board proceedings and other forms of intermediate and alternative dispute resolution, contract administration, and the management of claims arising during the course of a project, as well as arbitrations and litigations. Whatever advice is needed, our focus is always on your ultimate business objective, and we have the track record to show we can help you achieve it.

Our clients are some of the world's largest owners and contractors, involved in some of the highest value, complex international projects, in power (conventional, nuclear, hydroelectric and renewable), oil & gas facilities across the energy value chain, industrial plants, civil infrastructure, metals and mining, real estate development, shipbuilding, port development and dredging.

A large number of our projects and arbitrations involve bespoke EPC, turnkey, and other construction contracts, and we also have an in-depth understanding of all of the key industry standard documentation packages, such as FIDIC.

By partnering with us, you will have access to a team of experienced construction lawyers who will provide comprehensive strategic advice on your disputes. Our strength lies in our genuine engineering and construction know-how, and we operate at the leading edge of technological, policy, and legal trends which shape the construction industry.

Some highlights of our work are as below:
